Ratings On All Notes Placed On CreditWatch Negative In Spanish RMBS Transactions Bancaja 10 And Bancaja 11

Surveillance Credit Analyst:

Paloma Mateo-Guerrero, Madrid (34) 91-788-7211; paloma_mateo-guerrero@standardandpoors.com

OVERVIEW

- We have observed continuing deterioration in the portfolio credit quality and increasing delinquency rates across Bancaja 10 And Bancaja 11, and the reserve funds have been fully drawn in both transactions.
- We have placed on CreditWatch negative all classes of notes in Bancaja 10 and Bancaja 11.
- Bancaja (Caja de Ahorros de Valencia, Castellon y Alicante) originated these Spanish RMBS transactions in 2007.

MADRID (Standard & Poor's) July 6, 2010--Standard & Poor's Ratings Services today placed on CreditWatch negative its credit ratings on all classes of notes in Bancaja 10 Fondo de Titulizacion de Activos and Bancaja 11 Fondo de Titulizacion de Activos (see list below).

We have observed a continued deterioration in the credit quality of the underlying portfolios. We reviewed Bancaja 10 and Bancaja 11 in November 2008 and downgraded some of the junior classes due to a rapid increase in long-term arrears (see "Related Criteria And Research" below).

Since then, delinquencies have continued to grow significantly. As per the latest investor report, defaulted loans represented 3.23% of the pool in Bancaja 10, and 3.46% in Bancaja 11--compared with 0.37% and 0.37%, respectively, at the same time last year.

Based on these delinquency figures, we believe the likelihood of a rapid

Ratings On All Notes Placed On CreditWatch Negative In Spanish RMBS Transactions Bancaja 10 And Bancaja 11

increase in defaults, and the fact that both reserve funds have become fully drawn since the last review, may lead to negative rating actions.

Given the transactions' current performance, we anticipate that a significant portion of the current long-term arrears will roll into default--increasing, in our opinion, the likelihood of a breach of the interest-deferral trigger.

The reserve funds in both transactions are fully drawn. We believe this may soon adversely affect the whole structure in both transactions. Also, as credit enhancement for the junior classes decreases, it negatively affects the 'AAA' rated notes even if the interest-deferral trigger has not been breached.

We will now analyze the current characteristics of the underlying portfolios and cash flow mechanics in Bancaja 10 and 11, to investigate whether this warrants any change to the current ratings on the notes. We will report the results of our review and any rating changes in due course.

The Bancaja deals are Spanish residential mortgage-backed securities (RMBS) transactions backed by pools of first-ranking mortgages secured over owner-occupied residential properties in Spain. Bancaja originated the mortgage loans.
